

We are MG Traductores, an agency specializing in text translation and in-person, remote, and hybrid interpreting services.

Since 2014, we have strived to keep up with the growing technological advances around the world, so we can offer fast, accurate services at fair prices.

Our team is made up of expert translators and interpreters who are certified by the government, state, and/or federal authorities in different languages, such as English, French, Portuguese, Mandarin, Japanese, among others.

In addition to holding a professional degree in translation and interpreting, our translators and interpreters have a second degree or certification related to their area of expertise, such as engineering, economics, law, and the environment.

We have the best technical staff in central and southern Mexico, and professional audio and video equipment, such as cameras, interfaces, indoor and outdoor LED mega screens with 2.6, 3.9, and 6 mm pitches, 55-, 60-, and 80-inch TV screens, closed-circuit switches, and parliamentary microphones.

Interpretation

Face-to-face

We have portable and fixed equipment with a capacity for up to 10.000 people. Agile systems for delivery and reception of receivers. Bilingual staff. Professional interpreters who have a second career related to their area of expertise; in addition, some of them are expert interpreters.

Virtual

We have multilingual videoconferencing platforms such as Zoom, Webex, and Microsoft Teams that can accommodate up to 1.000 participants, bilingual facilitators, engineers, and qualified technicians.

Hybird

We have trained personnel to perform any type of analog-digital integration that our customers require, adapting to their budgets.
